Arrangement And Pattern Questions

Direction: Read the given information carefully and answer the following questions. 123 456 789 276 875

Question

If one is added to all the even numbers, then what is the difference between the second number from the left end and the first number from the right end?

Difficulty : Moderate   **Average Time : 40 Seconds**

Options :
1. 418
2. 814
3. 184
4. 148
5. 100

Solution

The correct answer is **Option 1** i.e. **418**

Given:

123 **456** 789 **276** 875

One is added to all the even numbers

123 457 789 277 875

The difference between the second number from the left end and the first number from the right end = 875 - 457 = 418

Hence, the correct answer is **418.**
