

# Blood Relation Questions Overview

Blood Relation Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Blood Relation Questions.

## Blood Relation Questions

Direction: Read the given information carefully and answer the following questions. In a family, there are 10 members namely, I, K, U, Y, Z, T, W, A, B, and X of three generations. I is the father of T, who is the only brother of Z and Y. W is the daughter-in-law of K, who is the mother-in-law of U. Z is not married and X is his only nephew. B, who has only one sister, is the granddaughter of Y's mother. X is not W's son. T only has 2 children.

## Question

How many male members are there in the family?

Difficulty : Moderate

Average Time : 53 Seconds

Options :

1. 4
2. 2
3. 3
4. 5
5. 6

## Solution

The correct answer is **Option 1** i.e. 4

I is the father of T, who is the only brother of Z and Y. T only has 2 children.

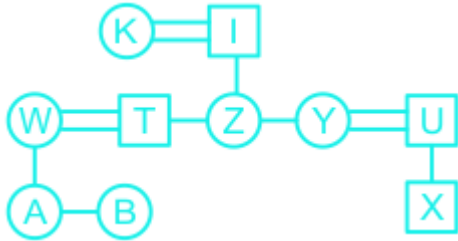

W is the daughter-in-law of K, who is the mother-in-law of U.

Z is not married and X is his only nephew.

B, who has only one sister, is the granddaughter of Y's mother.

X is not W's son.

By making the family tree based on the above information, we get all the relationships and gender of the family members.

There are 4 males in the family.

Hence, the correct answer is 4.
