It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Coordinate Geometry Questions.

Coordinate Geometry Questions

Direction: Bar chart given below shows Number of tigers in different National Parks i.e. A to D of a country in two different years. Study the data carefully and answer the following questions

Question

Average number of tigers in all National park in 2018 is how much less/more than average number of tigers in all National park in 1998?

Difficulty : Moderate

Average Time : 43 Seconds

Options :

1. 14
2. 16
3. 18
4. 20
5. 22

Solution

The correct answer is **option 2** i.e. **16**

Total number of tigers in 2018

$$= 36 + 52 + 32 + 48 = 168$$

Total number of tigers in 1998

$$= 64 + 40 + 48 + 80 = 232$$

Required difference = $(232/4) - (168/4)$

= $64/4 = 16$
