

# Data Interpretation Questions Overview

Data Interpretation Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Data Interpretation Questions.

## Data Interpretation Questions

The following bar graph consist of data regarding the number of patients admitted and visitors visiting in Aditya Health hospital from 1 January 2020 to 4 January 2020. Study the given graph and answer the following questions.

### Question

What is the average of total visitors on 1st and 3rd January and patients on 2nd and 4th January?

Difficulty : Moderate

Average Time : 41 Seconds

Options :

1. 230
2. 245
3. 344
4. 230
5. 280

### Solution

The correct answer is **Option 3** i.e 344

Understanding	Application
---------------	-------------

Total number of Visitors on  
1st and 3rd January = 350  
+ 500 = 850

Total number of patients on  
2nd and 4th January = 175  
+ 350 = 525

Required average =  $(850 + 525)/4 = 1375/4 = 343.75 \sim 344$

Hence, the  
correct answer  
is **344**
