

# Data Interpretation Questions Overview

Data Interpretation Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Data Interpretation Questions.

## Data Interpretation Questions

Directions: Study the following table carefully and choose the correct answer for the given questions. The various expenditure amounts are given in lakhs. Items of expenditure salary Fuel and transport Bonus Interest on loans Taxes

Year	2007	288	98	3.00	23.4	83	2008	342	112	2.52	32.5	108	2009	324	101	3.84	41.6	74	2010	336	133	3.68	36.4	88	2011	420	142	3.96	49.4	98
------	------	-----	----	------	------	----	------	-----	-----	------	------	-----	------	-----	-----	------	------	----	------	-----	-----	------	------	----	------	-----	-----	------	------	----

## Question

The ratio between the total expenditure on the taxes for all the years and the total expenditure on fuel and transport for all the years respectively is approximately?

Difficulty : Moderate

Average Time : 44 Seconds

Options :

1. 4:7
2. 10:13
3. 5:6
4. 5:8
5. 2:3

## Solution

The correct answer is **Option 2** i.e. **10:13**

Total expenditure on taxes:

$$= (83 + 108 + 74 + 88 + 98) = 451 \text{ lakhs}$$

Total expenditure on fuel and transport:

$$= (98 + 112 + 101 + 133 + 142) = 586 \text{ lakhs}$$

$$\text{Required ratio: } (451 / 586) = (1 / 1.3) = (10 / 13) = 10:13$$
