

Data Sufficiency Questions Overview

Data Sufficiency Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Data Sufficiency Questions.

Question

What is the code for the word 'Seema'? I. "Reena Seema Hina Karuna" is coded as "mn tk vx az" and "Arun Reena Varun Tarun" is coded as "vk rs tk bm". II. "Prerna Muskan Nehal Neha" is coded as "st uw mn cd" and "Neha Tarun Sneha Sukriti" is coded as "cd po rs qn".

Difficulty : Moderate

Average Time : 44 Seconds

Options :

1. Data in Statement I alone is sufficient
2. Data in Statement II alone is sufficient
3. Data either in Statement I alone or in Statement II alone is sufficient
4. Data in both Statements I and II together are not sufficient
5. Data in both Statements I and II together are necessary

Solution

The correct answer is **Option 4** i.e. **Data in both Statements I and II together are not sufficient**

From statement I:

We only find the code of Reena i.e. "tk".

From statement II:

We only find the code of Neha i.e. "cd".

From I and II:

We only find the code of Tarun i.e. "rs".

Clearly, we can't decide the code of Seema so, both statements together are not sufficient.

Hence, the correct answer is "Data in both Statements I and II together are not sufficient".
