

Devices Questions Overview

Devices Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Devices Questions.

Question

What does "EROM" stand for in computer memory?

Difficulty : Moderate

Average Time : 27 Seconds

Options :

1. Electrically Read Only Memory
2. Erasable Random Of Memory
3. Erasable Read Only Memory
4. Electrically Reader Optical Modulator
5. None of these

Solution

The correct answer is **Option 3** i.e. **Erasable Read-Only Memory**.

- "EROM" stands for Erasable Read-Only Memory in computer memory.
- It is a type of programmable read-only memory (PROM) chip that retains its data when its power supply is switched off.
- Computer memory that can retrieve stored data after a power supply has been turned off and back on is called non-volatile.
