Mathematical Inequality Questions Overview

Mathematical Inequality Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Mathematical Inequality Questions.

Mathematical Inequality Questions

Directions: In the given statement, relationship between different elements is shown and it is followed by two conclusions. Choose the correct answer on the basis of information given below.

Question

Statement: Z = W T B P Conclusion: I. Z > P II. Z = P

Difficulty : Moderate   **Average Time : 40 Seconds**

Options :

1. Only conclusion I is true

2. Only conclusion II is true

3. Either conclusion I or II is true

4. Neither conclusion I nor II is true

5. Both conclusions I and II are true

Solution

The correct answer is **Option 3** i.e. **Either conclusion I or II is true**.

Understanding

Statement: Z = W T B P

Conclusion:

I. Z > P: **False** (As Z = W T B P Z P)

II. Z = P: **False** (As Z = W T B P Z P)

Here, Both conclusions make a complementary pair i.e. if one is false than the other one is true.

Therefore, the correct answer is **Either conclusion I or II is true.**
