

Mathematical Inequality Questions Overview

Mathematical Inequality Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Mathematical Inequality Questions.

Mathematical Inequality Questions

Study the following information carefully and answer the questions given below: There are six students of different ranks in the class. R has higher rank than S and lower rank than P. Three persons' ranks are between Q and T, whose rank is just higher than U. Neither S nor U has the lowest rank.

Question

Who has the highest rank?

Difficulty : Moderate

Average Time : 44 Seconds

Options :

1. Q
2. P
3. R
4. S
5. None of these

Solution

The correct answer is option (2) i.e. P.

Understanding	Application
---------------	-------------

Rank of all persons
are
 $P > T > U > R > S >$
Q

Hence, P has the
highest rank.
