

Sentence Jumbles Questions Overview

Sentence Jumbles Questions have a good weightage in the Banking Exam and the type of question asked in Banking exam is similar to the question mentioned below. It has been solved and explained by Gargi.ai Experts and they have tried to elaborate the concept used in Sentence Jumbles Questions.

Question

In the following questions, a statement is divided into 5 different segments. Part (A) in the sentence is fixed and other parts may not be in the correct sequence. You have to rearrange the other parts of the sentence to make it contextually and grammatically correct and if the correct option of sequence doesn't match any of the given sequence mark (5) i.e., "None of the above" as your answer. There are literally hundreds of videos out there about what kinds of masks to use (A)/ This is not rocket science: the first goal is to prevent breathing in the virus (B)/ with our virus-coated hands! (C)/ The second, and perhaps even more important, is to prevent infected individuals from spreading infection, while breathing out (D)/by eliminating direct inhalation and minimising any chance that we deposit a large quantity to our face by touching it (E).

Difficulty : Moderate

Average Time : 64 Seconds

Options :

1. ABCDE
2. ABECD
3. ACBED
4. ADCBE
5. None of the above

Solution

The correct answer is Option 2, i.e. ABECD

Concept/Grammar Rules	Application
-----------------------	-------------

<p>The sentences must be realigned in a way that makes a meaningful statement as a result. Option 2, i.e. ABECD here seems to be the best sequence as it conforms to the entire theme of the passage.</p>	<p>Taking statement "A" under consideration "B" seems to show conjunction with it by stating about usage of masks and what is the first goal of it.</p> <p>Statement "E" seems to be succeeding "B" and after this "C" seems to be preceding "D" as "D" provides an ending to the statement by stating about the second goal of the intended usage of masks.</p> <p>So, we got a sequence i.e. ABECD, i.e. "There are literally hundreds of videos out there about what kinds of masks to use. This is not rocket science: the first goal is to prevent breathing in the virus, by eliminating direct inhalation and minimising any chance that we deposit a large quantity to our face by touching it with our virus-coated hands! The second, and perhaps even more important, is to prevent infected individuals from spreading infection, while breathing out"</p>
